

EHS COMPLIANCE CHECKLIST

1 - Energy Savings Opportunity Scheme (ESOS) Phase 3

All large companies in the UK and across the EU must complete energy audits across their buildings, processes and transport operations before the compliance deadline of 5th December 2023.

2 - Mandatory GHG Reporting and Disclosures

Streamlined Energy and Carbon Reporting (SECR) is a UK framework for large companies to report energy use and GHG emissions.

Carbon Disclosure Reporting (CDR) - a voluntary process for companies to report GHG emissions and reduction efforts to Carbon Disclosure Project (CDP).

3 - Environmental, Social, and Governance (ESG) Report

Used by stakeholders to assess a company's sustainability and social responsibility and make informed decisions, an ESG report is a voluntary document that provides information about a company's performance on environmental, social, and governance issues.

4 - Asbestos Management Surveys and Re-Inspections

A legal requirement on all non domestic premises constructed pre 2000 to have an Asbestos Management Survey in place identifying any Asbestos containing materials within the building to protect people from potential exposure to Asbestos. The Asbestos Re-inspection survey is conducted every 6-12 months following the Management Survey which monitors and records the condition of previously identified asbestos-containing materials in a building to ensure they do not pose a risk to health.

5 - Legionella Risk Assessments

An assessment which evaluates the risk of Legionella bacteria in a water system and identifies hazards and control measures to prevent the growth and spread of the bacteria and protect people from exposure. It is required to ensure a safe working environment.

6 - Lead in Paint Testing and Risk Assessments

Lead in paint testing evaluates presence and concentration of lead in paint to determine hazards and prevent health issues.

EHS COMPLIANCE CHECKLIST

7 - Safe Systems of Work (SSOW) / Safety Management Systems (SMS) Review

SSOW/SMS review identify and manage work risks to ensure worker safety, legally required by the Health and Safety at Work act.

8 - Fire Risk Assessment

Assessment of building compliance, that identifies hazards, and recommends improvements.

9 - Display Screen Equipment (DSE) Assessments

Conducted by trained professionals, DSE assessments check workstation setup to identify risks for employees using display screens.

10 - Annual Training Gap Analysis Review

Training gap analysis identifies deficiencies in current training programs.

11 - Review of Legal Registers

A review of Legal Registers is a process of evaluating the legal requirements and obligations that apply to an organisation or business, and identifying any gaps or deficiencies in the way that these requirements are being met.

12 - Environment, Health, and Safety (EHS) Compliance Audits

An EHS Compliance Audit is a systematic review of a company's operations, practices, and systems to assess their compliance with environmental, health, and safety laws, regulations, and standards.
